

Cedar County Emergency Management, in conjunction with Cedar County Public Health, has launched an informational webpage regarding the county's response to the COVID-19 pandemic:

[www.cedarcountycovid19.org](http://www.cedarcountycovid19.org)

As you are likely aware, there is a lot of incorrect information regarding COVID-19 being shared through social media and other avenues that is very overwhelming to our Cedar County residents. After consulting with our partners at Cedar County Public Health, this website was launched to create a 'one-stop location' for local information sharing and guidance throughout the duration of the COVID-19 event." The website, available at [www.cedarcountycovid19.org](http://www.cedarcountycovid19.org), provides links to official sources and information about the COVID-19 virus and will also include information received from Cedar County businesses regarding reduced hours, reduced staffing and any other changes in business operations in attempt to stop the community spread of this illness. Businesses, churches, community groups and other organizations serving Cedar County are encouraged email me ([jfreet@cedarcounty.org](mailto:jfreet@cedarcounty.org)) with changes to typical operations so that this information can be shared on the [www.cedarcountycovid19.org](http://www.cedarcountycovid19.org) website as well. If you are aware of any business closings/operational changes in your community, please let me know. Also, if you are limiting public access to city-owned facilities, please share that information as well—I'll be happy to get this information posted.
